

View: Registration Page (Employee)

Since the page design is displayed on other docs and registration layouts are pretty straightforward, I'll just draw a mock-up of the fields.

First Name:	Last Name:		
Address:		City:	State:
			Country:
PhoneNumber:	E-mail:		Zipcode:
SSN:	Date-of-Birth:		
Username:			
Password:			

View: User Log-In / First Screen

[26 x 17]

- ▶ [No tabs on log-in screen]
- ▶ [What kind of information needed for registration]
- ▶ [Submission progress not tracked here]

Keeping Track of Workflow

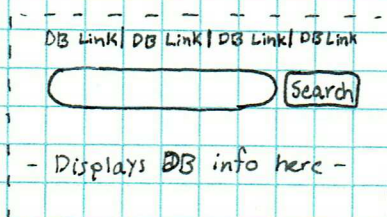

(Pretend it has a 4th node)

Note When hovering over a node, text should pop up describing the current stage

Owner's Search Function:

- Owner has ability to search databases for information, and has access to all information in them.
- Owner also has access to all databases in table form, but there should be an option to toggle this view due to the potential volume of information.

- The DB Link will have the general name of an important chunk of information in the DB (Employees/Project/Timesheets) that when clicked simply pulls the info from the DB and displays it under the search bar.

Owner's Profile/Home Page Options

- Information Overview
- Current Project Information
- Edit MOTD

- [Should we have an option for the owner to approve timesheets?]
- [What else needs to be included in the owner's page?]

Hand-drawn diagram of a web form layout on graph paper. The form has a header area with a "Submit" button and a "Cancel" button. Below the header is a large dashed rectangular area containing the text "Time sheet Image" and "Have". To the right of this area is a "Browse..." button. Below the dashed area is a "Submit Time sheet" button. At the bottom of the form is a dashed rectangular area containing the text "Work Flow Progress (no nodes lit)". To the right of this area is a "(Logo/Name)" label. The entire form is enclosed in a solid border.

lots of empty space, image
position might look better
on the left

► Browse Button : Leads to harddrive directory for filenameet image selection.

Submit Button: Takes user back to profile page, and lights node 1 on the work on progress.

Cancel & Takes user back to profile page
